

The Ultimate Solution

Advanced Engineering

SHAGA 40
CYPERMETHRIN EC

Say Goodbye to Xylene.

Low volatility, high penetration,
and **CMR-free (safe) profile.**

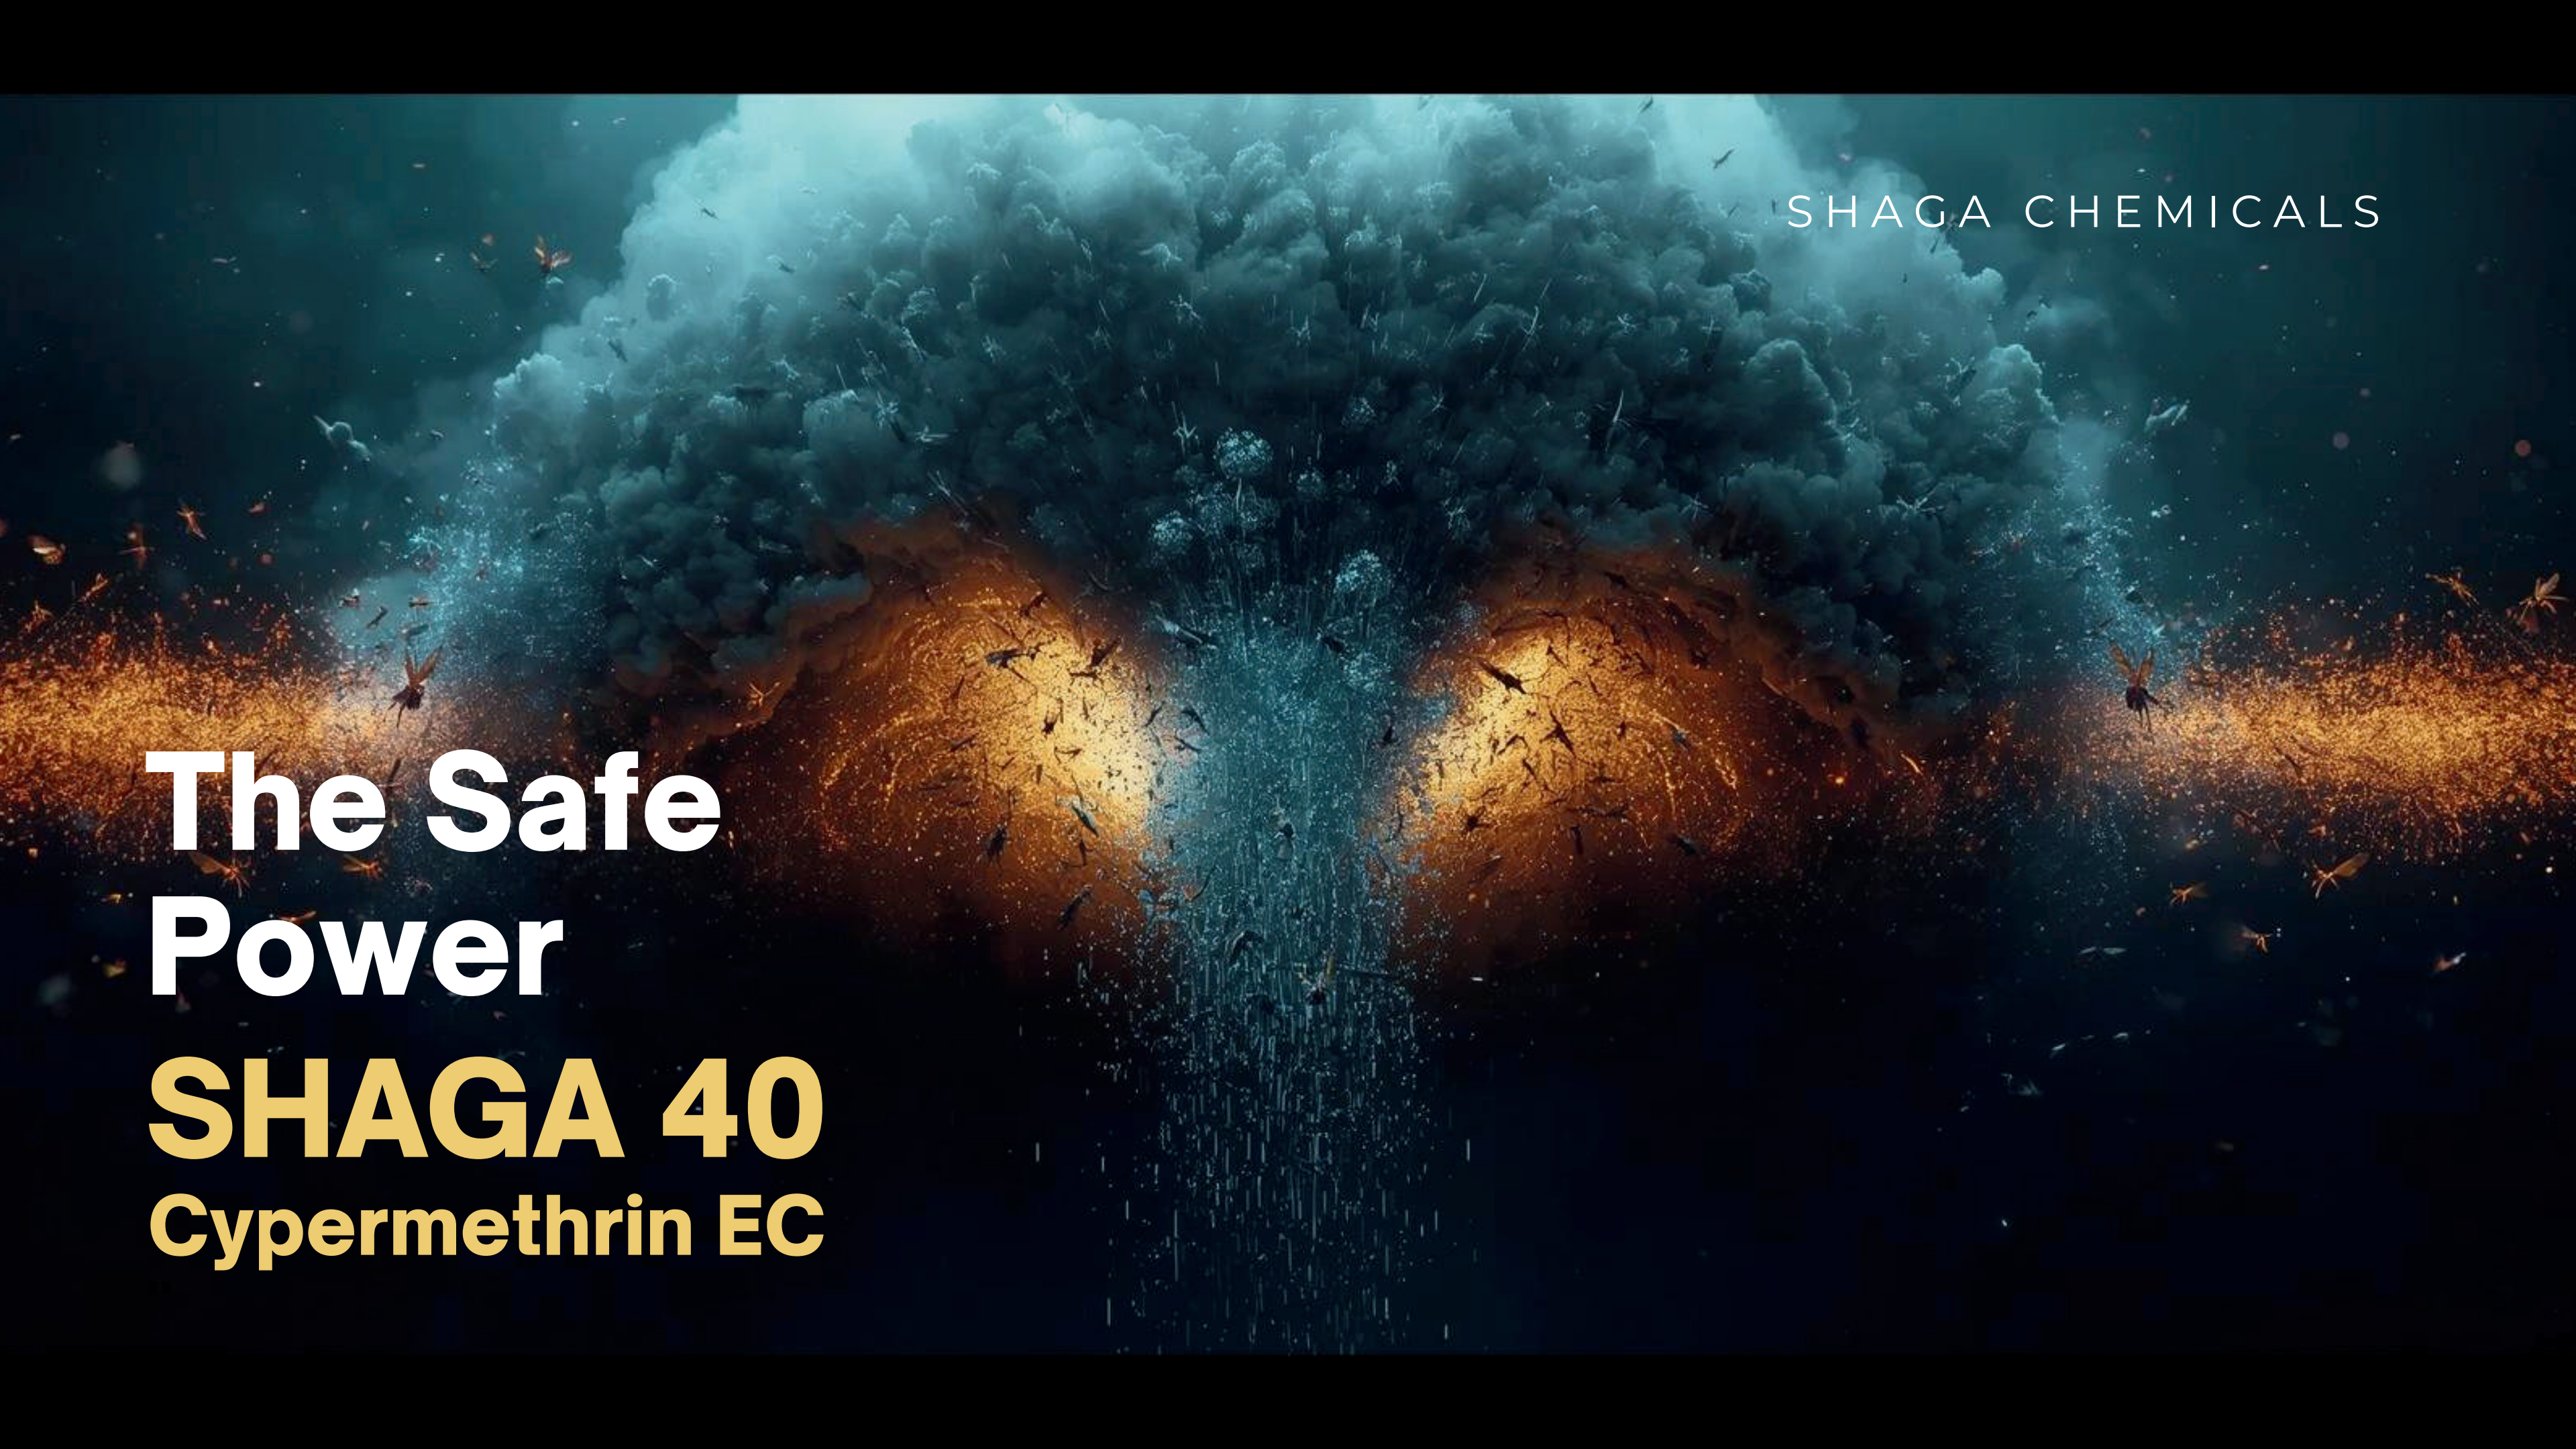

"A high-purity lipophilic carrier
system that replaces hazardous
solvents."

Function & Advantage:

Low volatility, high penetration,
and CMR-free (safe) profile.

SHAGA **ABSENCE**

ARCHITECT OF STABILITY

The backbone of the formulation

Flawless emulsion stability that does not separate or settle, even under the most challenging conditions.

Function & Advantage:
Spontaneous dispersion, long shelf life, and equipment-friendly (non-clogging) design.

The background of the entire image is a dark blue, almost black, field filled with a massive, dense swarm of mosquitoes. The mosquitoes are in various stages of flight, creating a sense of intense movement and overwhelming numbers. In the lower right portion of the image, a faint, light blue grid pattern is visible, resembling a technical or scientific background. The overall lighting is dim, with a slight gradient from the top to the bottom, where the grid pattern is more prominent.

The Safe Power

"Power doesn't mean risk. With our Shaga Globio-based formula; no odor, no irritation, no carcinogenic risk. Just performance."

SHAGA
cypermethrin

Economic Efficiency and Comparison

"Lower operational costs and higher field success rates compared to classic xylene-based formulas. Guaranteed ROI (Return on Investment) with Shaga."

A futuristic laboratory scene featuring a robotic arm with a black and white segmented gripper. The gripper is positioned over a black, rectangular device with a glowing orange border. The device's screen displays the text 'SHAGA 40 CYPERMETHRIN EC' in a bold, orange, sans-serif font. The background is a blurred laboratory with various pieces of equipment and a large window.
